1. Specifications List

- ORDERS Purchase Order
- ORDCHG Purchase Order Change
- DELFOR Forecast
- DELJIT Delivery Schedule (Authorization to Ship)
- DESADV Dispatch Advice (ASN)
- RECADV Receipt Advice
- INVOIC Invoice
- APERAK Application Acknowledgment
- CONTRL Message Acknowledgment

2. Message Schedule

- ORDERS On approval of Scheduling Agreement or Discrete/Framework PO
- ORDCHG On approval of change to ORDERS
- DELFOR Weekly sent either Sunday or early Monday morning
- DELJIT– Sent daily (early morning)

There may be occasions where multiple DELJITs are sent in a single day due to critical build changes.
- DESADV One ASN for every physical shipment
- RECADV At least one receipt advice for every ASN/Shipment
There may be occasions where multiple receipt advices are sent for a shipment.
- INVOIC One invoice per ASN shipment
- APERAK One Application Acknowledgment per ASN/Invoice
- CONTRL One Message Acknowledgment for every message sent/received

3. Business Rules

3.1 ORDERS (to Suppliers)

Frequency

- Orders will be provided on approval from Lucid

Business Rules

- One ORDERS per Trading Partner Purchase Order (PO), Ship From and Ship To locations
- Changes to ORDERS demand will be sent in a ORDCHG (see separate specification for this)
- ORDERS can be used to facilitate 3 differing Order Types:
 - Schedule Agreements - Annual Blanket orders
 - Contains information such as PO/Contract number, Agreed-upon annual quantities, Price with validity period
 - No authorization to ship demand
 - Standard Orders - Discrete orders, With Qty, Specific delivery date and Ship to location
 - Used in a variety of scenarios such as Prototype parts, Emergency orders, Interim orders pre-DELJIT
 - Authorized to ship demand
 - Framework Orders - Hybrid Blanket order, with specific Qty, Ship to Location and Horizon delivery range
 - This order type is used for VMI which is Lucid-owned inventory managed by the supplier
 - Authorized to ship demand
 - Supplier can send multiple shipments against this order within the Horizon range
- Each Standard/Framework PO Line item request will contain a unique release number
 - This unique release number will follow that demand item through its life
 - Changes to Line Item Quantity, Ship/Due date and Part number will not change the unique release number associated with this line item
- Data listed under 'INCLUDED IN ORDERS' transmitted in a Standard/Framework ORDERS transaction is expected to be returned in the DESADV and INVOIC, along with identified Release Number
- All messages must be responded to with a CONTRL response message

3.2 ORDCHG (to Suppliers)

Frequency

- Order changes will be provided on approval of Lucid changes

Business Rules

- One ORDCHG per Trading Partner Purchase Order (PO), Ship From and Ship To locations
- Each ORDCHG updates all previously received ORDERS/ORDCHG for a Purchase Order, Ship From, Ship To, including cancelling/deleting active (not shipped) requests that are no longer on the current ORDCHG
 - Example: Received ORDCHG for Purchase Order, Ship From and Ship To will replace, in its entirety, the last received ORDERS/ORDCHG for the same Purchase Order, Ship From and Ship To
- ORDCHG can be used to facilitate 3 differing Order Types:
 - Schedule Agreements - Annual Blanket orders
 - No authorization to ship demand
 - Standard Orders - Discrete orders, With Qty, Specific delivery date and Ship to location
 - Authorized to ship demand
 - Framework Orders - Hybrid Blanket order, with specific Qty, Ship to Location and Horizon delivery range
 - Authorized to ship demand
 - Supplier can send multiple shipments against this order within the Horizon range
- Each Standard/Framework PO Line item request will contain a unique release number
 - This unique release number will follow that demand item through its life
 - Changes to Line Item Quantity, Ship/Due date and Part number will not change the unique release number associated with this line item
 - In instances where Lucid Motors receives a short-shipped quantity, the next ORDCHG transmitted will contain the original requested quantity. The Suppliers' system must make adjustments to the quantity to ensure accurate fulfillment of requested quantity for that release number.
 - Example: Original demand was for a quantity of 500 and 200 were shipped. The ORDCHG will still show a quantity of 500 but the remaining quantity to ship is 300.

- Data listed under 'INCLUDED IN ORDCHG' transmitted in a Standard/Framework ORDCHG transaction is expected to be returned in the DESADV and INVOIC, along with identified Release Number
- All messages must be responded to with a CONTRL response message
- Changes to the required Purchase Orders will be contained within the ORDCHG message

3.3 DELFOR (to Suppliers)

Frequency

- Weekly on Sunday or early Monday morning
- 'Change' DELFORs may also be sent throughout the week to update only the related demand changes

Period Covered

Up to 12-month forecast composed of weekly and monthly quantities

- These quantities are not fixed
- The Forecast starts from the end of the DELJIT and will contain up to 52 weeks

Business Rules

- One DELFOR per Trading Partner Scheduling Agreement, Ship From and Ship To locations
- Each 'Replace' (BGM03=5) DELFOR updates each previously received DELFOR for a Scheduling Agreement, Ship From, Ship To, including cancelling/deleting active (not shipped) requests that are no longer on the current DELFOR
 - Example: Received DELFOR for Scheduling Agreement, Ship From and Ship To will replace, in its entirety, the last received DELFOR for the same Scheduling Agreement, Ship From and Ship To
- All messages to be responded by CONTRL response message

Not included

- Release numbers
- Delivery or shipping times

Required

- Authorization for Raw material and Fabrication release
- Current Cumulative quantity

3.4 DELJIT (to Suppliers)

Frequency

Daily

- 'Change' (BGM03=4) DELJIT may also be sent in a single day to update specific demands.
- Multiple 'Replace' (BGM03=5) DELJIT may also be sent in a single day due to critical build changes

Period Covered

Up to 50 days of scheduled Delivery requirements

Business Rules

- One DELJIT per Trading Partner Scheduling Agreement, Ship From and Ship To locations
- Each 'Replace' (BGM03=5) DELJIT updates each previously received DELJIT for a Scheduling Agreement, Ship From, Ship To, including cancelling/deleting active (not shipped) requests that are no longer on the current DELJIT
 - Example: Received DELJIT for Scheduling Agreement, Ship From and Ship To will replace, in its entirety, the last received DELJIT for the same Scheduling Agreement, Ship From and Ship To
- Each Line item request will contain a unique release number
 - This unique release number will follow that demand item through its life
 - Changes to Line Item Quantity, Ship/Due date and Part number will not change the unique release number associated with this line item
 - In instances where Lucid Motors receives a short-shipped quantity, the next shipping schedule to be transmitted will contain the original quantity from the previous shipment. The remaining quantity will retain the same release number as the previous shipment.
 - Example: Original demand was for a quantity of 500 and 200 were shipped. The next DELJIT will still show a quantity of 500 but the remaining quantity to ship is 300.
- All messages must be responded to with a CONTRL response message

Not included

- Authorization for Raw material or Fabrication release

Required

- Unique release numbers for each Scheduled delivery days
- Part Price
- Due date and/or Ship date, at least one is provided
- Current Cumulative quantity data + Last ASN quantity received

3.5 DESADV (to Lucid)

Frequency

Before each shipment arrives at Lucid Motors: ASN'S MUST BE TRANSMITTED AND RECEIVED BY LUCID WITHIN 15 MINUTES OF THE SHIPMENT LEAVING THE SHIPPER FACILITY. THE RECEIPT OF THE CONTRL IS THE ACCEPTANCE POINT OF THIS TRANSACTION

Business Rules

- One ASN per Shipment
- One ASN per Ship To and Ship From locations
 - Scheduling Agreement and Purchase Order demand can be mixed on the ASN but each pack and/or master pallet must only contain one Release Number
- One ASN per Ocean Container and/or Truck
- All ASNs to be received by Lucid within 15 minutes of Shipment leaving Shipper location
- All label info to be included in ASN
- All packaging serials for inners and outers (containers, pallets) to be included in ASN to ensure accurate pick pack ship
- Must include Purchase Order or Schedule Agreement number, PO/SA Line-Item number and Release number
- A total Carton (the container that holds the parts) count is required
- One release number per part in pack and master pallet
- All International ASNs must use the Country-of-Origin segment as the ultimate country of manufacture identifier
- All International ASNs must include the DSV/Carrier provided House bill number
- All ASNs must include the DSV or Carrier provided SCAC and Load ID/Tracking Number
 - Where a Supplier ships Internationally using an alternate carrier to DSV or DSV provided pick up, then the Supplier must ensure the ASN contains the SCAC, Load ID/Tracking Number, House/Master Bill, Mode of Transport and Mode of Transport details such as Vessel/Container Nos, Airline/Flight details
 - Where a Supplier ships domestically using an alternate carrier to DSV or DSV provided pick up, then the Supplier must ensure the ASN contains the SCAC, Load ID/Tracking Number, Mode of Transport and Mode of Transport details such as Container Nos, Airline/Flight details
- The DSV shipment id is not to be used as the Unique ASN number
- All ASNs will be acknowledged with a CONTROL and APERAK

- If an ASN must be resent, follow these steps:
 - Add a suffix to the original ASN Ship ID (BGM02)
 - Lucid will not accept duplicate Ship ID values
 - Send the DESADV
 - When an accepted/accepted with errors APERAK is received, contact your Buyer to let them know that the original Ship ID should be cancelled

Required

- Purchase Order/Schedule Agreement number/Line numbers
 - Release number
 - DSV Load ID or Tracking Number
 - House Bill (for international shipments)
 - All packaging serials for outer containers (containers, pallets) to ensure accurate pick pack ship.
 - All label information
-
- If an ASN must be re-sent, follow these steps:
 - Cancel already-acknowledged ASN by sending the same ASN with a purpose code of 'Cancel'
 - Once CONTRL and APERAK is received indicating acceptance, send the same ASN with purpose code of 'Original'

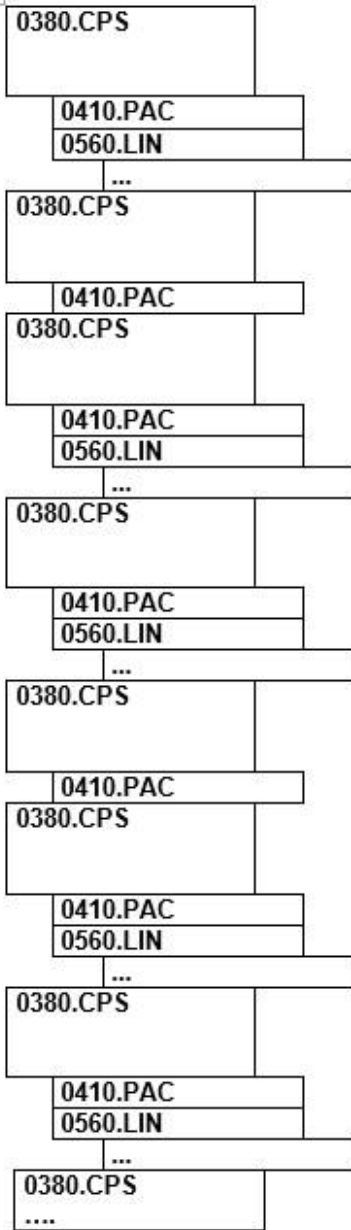

NOTE The original ASN number can be used again, or a suffix can be added if the supplier system needs a different ASN number. Lucid's system will allow the same ASN number in this situation.

3.6 DESADV Packaging Information

Packaging Information

- The transmission of packaging information is done in different steps: The innermost packaging, i.e., the one containing the parts, is transmitted in the PAC segment preceding the LIN segment containing the related part number (segment group 10 with CPS/7075 = 1); outer packaging components (like pallets) are identified in PAC segments (segment group 10 with CPS/7075 = 3) transmitted before the inner containers with its LIN segments.
- The Hierarchy trigger (CPS/7166) will indicate the Parent-Child relationship between outer and inner containers, where Inner containers are children to the pallet.
- The sequence of the segments will be as shown below.
- The following packaging examples are meant to illustrate the information above.

NOTE To make the examples easier to understand, not all LIN related segments have been included. In the message, they **MUST** be included.

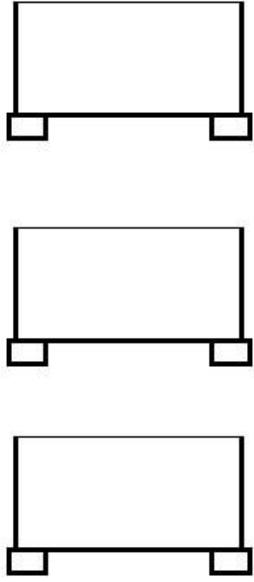

Detail Loop Counter- 7164 = 1 Detail Hierarchy segment 7166 = (Blank) Detail trigger segment 1 - 7075 = 5 (Standalone container)
identification and number of Containers Part number 1 Part number details
Detail Loop Counter- 7164 = 2 Detail Hierarchy segment 7166 = (Blank) Detail trigger segment N - 7075 = 3 Pallet type identification and number of pallets
Detail Loop Counter- 7164 = 3 Detail Hierarchy segment 7166 = 2 "See CPS 7164=2 above" Detail trigger segment 1 - 7075 = 1
identification and number of Containers Part number 2 Part number details
Detail Loop Counter- 7164 = 4 Detail Hierarchy segment 7166 = 2 "See CPS 7164=2 above" Detail trigger segment 2 - 7075 = 1
identification and number of Containers Part number 2 Part number details
Detail Loop Counter- 7164 = 5 Detail Hierarchy segment 7166 = (Blank) Detail trigger segment N - 7075 = 3 Pallet type identification and number of pallets
Detail Loop Counter- 7164 = 6 Detail Hierarchy segment 7166 = 5 "See CPS 7164=5 above" Detail trigger segment 1 - 7075 = 1
identification and number of Containers Part number 3 Part number details
Detail Loop Counter- 7164 = 7 Detail Hierarchy segment 7166 = 5 "See CPS 7164=5 above" Detail trigger segment 2 - 7075 = 1
identification and number of Containers Part number 4 Part number details

3.7 RECADV (to Suppliers)

Frequency

- After each loaded shipment arrives at Lucid Motors

Business Rules

- One-to-many RECADV per ASN
 - It may be necessary for the receiving plant to send out multiples if a shipment is not processed in one instance due to unforeseeable situations.
- All RECADV must be responded to with a CONTRL

3.8 INVOIC (to Lucid)

Frequency

- One Invoice per ASN sent to Lucid

Business Rules

- One Invoice per ASN/Shipment
- Invoices to be generated and sent after the full receipt of Lucid RECADV(s) (Delivery receipt advice)
- All messages will receive a CONTRL response
- All INVOIC will receive an APERAK response

Required

- ASN number
- Purchase Order or Schedule agreement number
- Purchase Order or Schedule agreement line item
- Release number
- Part price

3.9 APERAK/CONTRL

APERAK

- Lucid will send APERAK for ASNs and Invoices

Provides

- Acceptance
- Acceptance with error details
- Rejected with rejection details

CONTRL

- Every message must be responded to with a CONTRL message

3.10 Labeling Business Rules

- All data on the label will be sent via DESADV
- License Plate Number is also known as a Serial Number
 - **Pack** is the container (box) that holds the product
 - **Pallet** is the mixed or master load container (skid, rack, etc.) that holds packs
- Stand-alone packs may exist

4. EDI Data Flow
